

# SMARTDEVICES.COM

The category-defining domain for the next generation of intelligent hardware.

Privately held. Discreetly offered.

## OVERVIEW

SmartDevices.com is a premium, intuitive identity for companies building intelligent hardware. It reads like a market category and scales from consumer to enterprise without dilution.

## IDEAL FITS

AI hardware and edge compute brands  
Robotics and automation platforms  
Consumer electronics leaders  
Health, energy, and home device ecosystems

## WHY IT MATTERS

Instant clarity: the name explains the space in one word.  
Credibility: a .com category domain signals leadership and permanence.  
Versatility: works for product lines, marketplaces, media, or a holding brand.

## POSITIONING

At the intersection of AI, hardware, and everyday life - where the next generation of products becomes mainstream.  
One name that can unify launches, partnerships, and global expansion.

## ACQUISITION

Discreet, founder-friendly process.  
Escrow supported. Fast close available for qualified buyers.  
Serious inquiries welcomed - please include intended use and timeline.

## INQUIRIES
